Test Regression Report

Introduction

Il presente report di test di regressione rappresenta la continuazione del Test Execution Report, dove sono state identificate alcune anomalie nell'esecuzione di alcuni test case. Questo nuovo report fornisce un'analisi dei test case che sono stati eseguiti nuovamente dopo aver effettuato le opportune correzioni. Il report si concentra sulla verifica della stabilità del sistema e sulla conferma che le correzioni apportate abbiano effettivamente risolto le problematiche riscontrate in precedenza. Inoltre, questo report mira a garantire la qualità e la robustezza del sistema in questione, al fine di garantirne il corretto funzionamento.

Di seguito verranno riportati tutti i log delle esecuzioni di test dopo le modifiche effettuate.
